- [4] A. Bozkurt, B. Esmaeili, D. H. Brooks, J. Dy, and J.-W. van de Meent. “Can VAEs Generate Novel Examples?” In: *NeurIPS Workshop on Critiquing and Correcting Trends in Machine Learning*. 2018.

EDUCATION

University of Amsterdam

2021 – Present

PhD, Computer Science

Advisor: Prof. Jan-Willem van de Meent

Area: Machine Learning, Deep Generative Models, Representation Learning

Northeastern University (*Transferred*)

2017 – 2021

PhD, Computer Science

Advisor: Prof. Jan-Willem van de Meent

Area: Machine Learning, Deep Generative Models, Representation Learning

University of Edinburgh

2016 – 2017

MSc, Data Science

Grade: **Distinction** (above 70%)

Advisor: Prof. Michael Guttman

Dissertation: Bayesian Optimization for Likelihood Free Inference

University of Edinburgh

2012 – 2016

BSc (Hons), Artificial Intelligence and Computer Science

Grade: **First Class** (above 70%)

Advisor: Prof. Michael Herrman

Dissertation: Particle Swarm Optimization

EXPERIENCE

Teaching Assistant

- DS-5230 – Unsupervised Machine Learning and Data Mining
- CS-7140 – Advanced Machine Learning

Spring 2021

Spring 2018

Research Assistant

Summer 2014

University of Edinburgh

School of Informatics

Advisor: Prof. Paul Anderson

Project: Social media interaction models for teaching and learning

REVIEWING

Advances in Neural Information Processing Systems (NeurIPS)

2019 – 2021

International Conference on Machine Learning (ICML)

2020 – 2021

AAAI Conference on Artificial Intelligence (AAAI)

2020 – 2021

International Conference on Artificial Intelligence and Statistics (AISTATS)

2021

International Conference on Learning Representations (ICLR)

2021

Awards:

International Conference on Machine Learning (ICML) - Top 10% Reviewer Award

2021

International Conference on Machine Learning (ICML) - Top 33% Reviewer Award

2020

Advances in Neural Information Processing Systems (NeurIPS) - Top 50% Reviewer Award

2019

RESEARCH INTERESTS

I am interested in deep generative models and how we can guide them towards learning useful representations for downstream tasks. I am also interested in the intersection of information theory and representation learning. I am also a fan of probabilistic programming which I think provides exciting opportunities for abstracting probabilistic models as well as general frameworks for inference.
